

Electrical & Electronics Abstracts

2001

Number 12

CLASSIFICATION AND CONTENTS

The abstracts are arranged by subject in accordance with the following scheme. The page number for each section is given. The CLASSIFICATION AND CONTENTS is followed by an alphabetical guide to the scheme, the SUBJECT GUIDE.

	page		page
0000 GENERAL TOPICS, ENGINEERING MATHEMATICS AND MATERIALS SCIENCE	11105	1000 CIRCUIT THEORY AND CIRCUITS	11215
0100 GENERAL ELECTRICAL ENGINEERING TOPICS	11105	1100 CIRCUIT THEORY	11215
0120 Education and training	11108	1110 Network topology	11215
0140 Administration and management	11111	1130 General circuit analysis and synthesis methods	11215
0140B Planning	11112	1130B Computer-aided circuit analysis and design	11216
0150 Electrical contracting and installation	11113	1150 Linear network analysis and design	11220
0160 Plant engineering, maintenance and safety	11113	1150D Lumped linear networks	—
0170 Project and production engineering	11114	1150F Distributed linear networks	11220
0170C Project and design engineering	11114	1160 Nonlinear network analysis and design	11220
0170E Production facilities and engineering	11115	1165 Chaotic behaviour in circuits	11221
0170G General fabrication techniques	11117	1180 Time varying and switched networks	11221
0170J Product packaging	11118	1190 Other and miscellaneous topics in circuit theory	—
0170L Inspection and quality control	11126	1200 ELECTRONIC CIRCUITS	11222
0170N Reliability	11128	1205 Analogue circuit design, modelling and testing	11222
0170Q Environmental factors	11132	1210 Power electronics, supply and supervisory circuits	11222
0170S Control equipment and processes in production engineering	11133	1220 Amplifiers	11224
0180 Other general electrical engineering topics	11134	1230 Signal generators	11226
0200 ENGINEERING MATHEMATICS AND MATHEMATICAL TECHNIQUES	11134	1230B Oscillators	11226
0210 Algebra	11134	1230G Function generators	11227
0220 Mathematical analysis	11135	1230J Pulse generators	11227
0230 Integral transforms	11136	1250 Modulators, demodulators, discriminators and mixers	11227
0240 Probability and statistics	11136	1260 Pulse circuits	11228
0240C Queueing theory	11137	1265 Digital electronics	11228
0240E Game theory	11139	1265A Digital circuit design, modelling and testing	11228
0240G Monte Carlo methods	11140	1265B Logic circuits	11239
0240J Markov processes	11141	1265D Memory circuits	11244
0240Z Other topics in statistics	11142	1265F Microprocessors and microcomputers	11248
0250 Combinatorial mathematics	11147	1265H A/D and D/A converters	11252
0260 Optimisation techniques	11151	1265Z Other digital circuits	11253
0290 Numerical analysis	11158	1270 Filters and other networks	11254
0290B Error analysis in numerical methods	11158	1270D Passive filters and other passive networks	11254
0290D Functional analysis (numerical analysis)	11159	1270E Active filters and other active networks	11254
0290F Interpolation and function approximation (numerical analysis)	11159	1270F Digital filters	11256
0290H Linear algebra (numerical analysis)	11164	1280 Mixed analogue-digital circuits	11257
0290K Nonlinear and functional equations (numerical analysis)	11166	1285 Analogue processing circuits	11258
0290M Numerical integration and differentiation	11167	1290 Other analogue circuits	11258
0290P Differential equations (numerical analysis)	11167	1290B Converters	11258
0290R Integral equations (numerical analysis)	11171	1295 Neural nets (circuit implementations)	11259
0290T Finite element analysis	11171	1300 MICROWAVE TECHNOLOGY	11259
0290X Integral transforms in numerical analysis	11176	1305 Microwave materials	11259
0290Z Other numerical methods	11178	1310 Waveguides and striplines	11259
0500 MATERIALS SCIENCE FOR ELECTRICAL AND ELECTRONIC ENGINEERING	11178	1320 Waveguide and stripline components	11260
0510 Crystal growth	11178	1350 Microwave circuits and devices	11263
0520 Thin film growth and epitaxy	11181	1350D Parametric microwave circuits and devices	—
0520B Sputter deposition	11181	1350F Solid-state microwave circuits and devices	11264
0520D Vacuum deposition	11183	1350H Microwave integrated circuits	11266
0520F Chemical vapour deposition	11187	1350P Microwave photonics	11272
0520H Pulsed laser deposition	11199	1370 Industrial and medical applications of microwaves	11273
0520J Deposition from liquid phases	11200	2000 COMPONENTS, ELECTRON DEVICES AND MATERIALS	11274
0520X Other thin film deposition techniques	11203	2100 PASSIVE CIRCUIT COMPONENTS, CABLES, SWITCHES AND CONNECTORS	11274
0530 Metals and alloys (engineering materials science)	11205	2110 Conductors	11274
0540 Ceramics and refractories (engineering materials science)	11206	2120 Resistors	11274
0550 Composite materials (engineering materials science)	11207	2130 Capacitors	11275
0560 Polymers and plastics (engineering materials science)	11209	2140 Inductors and transformers	11276
0570 Glasses (engineering materials science)	11211	2160 Wires and cables	11276
0580 Powders and porous materials (engineering materials science)	11211	2160D Cable accessories	—
0585 Intelligent materials (engineering materials science)	11212	2180 Electrical contacts	11277
0587 Fullerenes, carbon nanotubes, and related materials (engineering materials science)	11213	2180B Relays and switches	11277
0590 Materials testing	11213	2180E Connectors	11277
		2190 Fuses	11277
		2200 PRINTED CIRCUITS, HYBRID INTEGRATED CIRCUITS AND MOLECULAR ELECTRONICS	11278
		2210 Printed circuits	11278
		2210B Printed circuit layout and design	11278

	page		page
2210D Printed circuit manufacture	11279	2860C Acoustic wave devices	11415
2210F Printed circuit accessories	11282	2860F Ferroelectric devices	11415
2220 Integrated circuits	11282	2890 Other dielectric applications and devices	11416
2220C General integrated circuit fabrication techniques	11282		
2220E Thin film circuits	11282		
2220G Thick film circuits	11282	3000 MAGNETIC AND SUPERCONDUCTING MATERIALS AND DEVICES	11416
2220J Hybrid integrated circuits	11282		
2230 Molecular electronics	11282		
2230B Biomolecular electronics	11283	3100 MAGNETIC MATERIALS AND DEVICES	11416
2230F Fullerene, nanotube and related devices	11283	3110 Magnetic materials	11416
2240 Microassembly techniques	11284	3110C Ferromagnetic materials	11417
2250 Multichip modules	11284	3110E Ferrites and garnets	11421
		3110M Magnetic multilayers	11421
2300 ELECTRON TUBES	11285	3120 Magnetic material applications and devices	11423
2310 Vacuum physics	11285	3120B Magnetic recording	11423
2315 Gas discharges	11285	3120D Magnetic cores	11424
2320 Electron emission, materials and cathodes	11286	3120E Permanent magnets	11425
2330 Electron tube technology and manufacture	—	3120G Microwave magnetic devices	11426
2340 Vacuum tubes	11287	3120J Magneto-acoustic, magnetoresistive, magnetostrictive and magnetostatic wave devices	11426
2340B Transmuting valves	—	3120L Magnetic bubble domain devices	11427
2340E Vacuum microelectronics	11287	3120N Magnetic thin film devices	11427
2350 Microwave tubes	11287	3120W Other magnetic material applications and devices	11427
2350D Travelling wave tubes	11288		
2350F Electron beam semiconductor tubes	—		
2360 Electron beam scanned tubes	11288	3200 SUPERCONDUCTING MATERIALS AND DEVICES	11428
2360C Solid-state tubes	—	3220 Superconducting materials	11428
2370 Phototubes	11288	3220B Conventional low-temperature superconducting materials	11428
2380 Gas discharge tubes and devices	11289	3220H High-temperature superconducting materials	11428
2390 Electron and ion microscopes	11289	3220M Superconducting wires and tapes	11430
2395 Other electron tubes	—	3240 Superconducting devices	11434
		3240C Superconducting junction devices	11434
2500 SEMICONDUCTOR MATERIALS AND DEVICES	11289	3240E Superconducting coils and magnets	11437
2520 Semiconductor theory, materials and properties	11289	3240M Superconducting microwave devices	11438
2520C Elemental semiconductors	11289	3240R Superconducting receivers and detectors	11439
2520D II-VI and III-V semiconductors	11293	3240Y Other superconducting devices and material applications	11439
2520E Oxide and ferrite semiconductors	11300		
2520F Amorphous and glassy semiconductors	11300	4000 OPTICAL MATERIALS AND APPLICATIONS, ELECTRO-OPTICS AND OPTOELECTRONICS	11440
2520M Other semiconductor materials	11301		
2530 Semiconductor junctions and interfaces	11303	4100 OPTICAL MATERIALS AND DEVICES	11440
2530B Semiconductor junctions	11303	4110 Optical materials	11440
2530C Semiconductor superlattices, quantum wells and related structures	11305	4120 Optical storage and retrieval	11443
2530D Semiconductor-metal interfaces	11311	4125 Fibre optics	11444
2530F Metal-insulator-semiconductor structures	11313	4130 Optical waveguides	11454
2530G Metal-insulator-metal and metal-semiconductor-metal structures	11315	4140 Integrated optics	11460
2530N Other semiconductor interfaces and junctions	11316	4145 Micro-optical devices and technology	11462
2550 Semiconductor device technology	11317	4150 Electro-optical devices	11464
2550A Annealing processes in semiconductor technology	11319	4150D Liquid crystal devices	11465
2550B Semiconductor doping	11325	4160 Magneto-optical devices	11466
2550E Surface treatment (semiconductor technology)	11334	4170 Acousto-optical devices	11467
2550F Metallisation and interconnection technology	11341	4180 Optical logic devices and optical computing techniques	11467
2550G Lithography (semiconductor technology)	11347	4190 Other optical system components	11468
2550N Nanometre-scale semiconductor fabrication technology	11349	4190F Optical coatings and filters	11469
2550R Radiation effects on semiconductor devices	11350		
2550X Semiconductor process modelling and simulation	11351	4200 OPTOELECTRONIC MATERIALS AND DEVICES	11471
2560 Semiconductor devices	11351	4210 Photoconducting materials and properties	11471
2560B Semiconductor device modelling and equivalent circuits	11353	4220 Luminescent materials	11472
2560F Bulk effect devices	11353	4220M Phosphors	11474
2560H Junction and barrier diodes	11356	4250 Photoelectric devices	11475
2560J Bipolar transistors	11358	4260 Electroluminescent devices	11477
2560L Thyristors and silicon controlled rectifiers	11360	4260D Light emitting diodes	11477
2560P Power semiconductor devices	11363	4270 Integrated optoelectronics	11482
2560R Insulated gate field effect transistors	11374		
2560S Other field effect devices	11376	4300 LASERS AND MASERS	11483
2560X Quantum interference devices	11377	4310 Masers	11483
2560Z Other semiconductor devices	11377	4320 Lasers	11483
2570 Semiconductor integrated circuits	11380	4320C Gas lasers	11483
2570A Semiconductor integrated circuit design, layout, modelling and testing	11388	4320E Liquid lasers and organic dye lasers	11489
2570B Bipolar integrated circuits	11388	4320F Fibre lasers and amplifiers	11490
2570D CMOS integrated circuits	11388	4320G Solid lasers	11493
2570F Other MOS integrated circuits	11393	4320J Semiconductor lasers	11496
2570H Other field effect integrated circuits	11394	4320K Free electron lasers	11505
2570K Mixed technology integrated circuits	11394	4320L Laser resonators and cavities	11505
2570P Power integrated circuits	11395	4320M Laser accessories and instrumentation	11507
2575 Micromechanical device technology	11395	4330 Laser beam interactions and properties	11508
2575B Materials for micromechanical device technology	11396	4330B Laser beam modulation, pulsing and switching: mode locking and tuning	11510
2575D Design and modelling of micromechanical devices	11397	4340 Nonlinear optics and devices	11514
2575F Fabrication of micromechanical devices	11398	4340F Optical phase conjugation and multiwave mixing	11515
		4340G Optical saturation and related effects	11517
2800 DIELECTRIC MATERIALS AND DEVICES	11401	4340J Optical self-focusing and related effects	11518
2810 Dielectric materials and properties	11401	4340K Optical harmonic generation, frequency conversion, parametric oscillation and amplification	11520
2810D Dielectric breakdown and discharges	11402	4340P Optical bistability, multistability and switching	11523
2810E Gaseous insulation, breakdown and discharges	11403	4340S Optical solitons	11523
2810F Piezoelectric and ferroelectric materials	11404	4350 Holography	11525
2830 Insulation and insulating coatings	11411	4360 Laser applications	11528
2830C Organic insulation	11411	4360B Laser materials processing	11528
2830E Inorganic insulation	11413	4360E Metrological applications of lasers	11530
2860 Piezoelectric and ferroelectric devices	11413	4360H Biological and medical applications of lasers	11532
2860A Piezoelectric devices	11413
